Education

Guru Gobind Singh Educational Society's Technical Campus

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.51/10

Sep 2022 – Jun 2026

Bokaro, Jharkhand

Central Board of Secondary Education (CBSE)

Intermediate – Science (PCM) | Score: 92%

Jul 2021

India

Technical Skills

Programming Languages: JavaScript, Python, SQL, Java, HTML5, CSS3

Frontend Technologies: React.js, React Router v6, Tailwind CSS, Vite, Responsive Design,

Backend Technologies: Flask, Node.js, REST API Design, JWT Authentication

AI / ML: TensorFlow, CNN, Deep Learning, LLM APIs, OpenCV, AST Parsing, Streamlit

Databases: SQLite, MySQL, Database Schema Design, Query Optimisation

Cloud & Tools: Git, GitHub, Data Structures & Algorithms, OOP, DBMS, OS Concepts

Professional Experience

Infosys Springboard – Virtual Internship 6.0

Dec 2025 – Mar 2026

Artificial Intelligence Intern

Remote

- Built an end-to-end **Automated Python Docstring Generator** using AST parsing and LLM APIs, reducing manual documentation effort by **70%** across 100+ lines of Python source code in real time.
- Implemented a custom **AST Node Visitor** for function and class detection; integrated Google & NumPy-style multi-format output with LLM rate-limiting and edge-case handling for nested functions and decorators.
- Completed structured training in Machine Learning fundamentals, AI application workflows, and responsible AI development practices.

Innobyte Services

Jun 2025 – Jul 2025

Web Developer Intern

Remote

- Redesigned a commercial website using **HTML, CSS, and JavaScript** with a fully responsive modern UI, improving UI/UX performance by **80%** across all device sizes and screen widths.
- Achieved cross-browser compatibility and optimised interactive components and layout structure, reducing page load friction and improving overall user experience.

Projects

Doc-AI – Healthcare Diagnosis System | [GitHub](#)

React 18, Vite, React Router v6, Tailwind CSS, Flask, Python, REST API, JWT

- Problem:** Manual doctor discovery and appointment booking is fragmented across multiple platforms, causing delays in patient care. **Built** a full-stack medical AI platform integrating **5 core modules** – symptom triage, X-ray diagnosis, appointment booking, reports management, and FindCare provider search – into a single unified application, **reducing patient navigation steps by ~60%**.
- Eliminated UI inconsistency** across **8+ pages** by engineering a **reusable Tailwind CSS component library of 20+ components**; enforced a mobile-first design system that achieved **100% responsive compatibility** across all screen sizes and reduced per-page styling effort by **~40%**.
- Solved authentication fragmentation** by designing **10+ Flask REST API endpoints** with **JWT-based stateless authentication**, protected route middleware, and role-based access control – cutting unauthorised access surface area and enabling **secure session handling** without server-side state.
- Decoupled frontend and backend** by implementing **React Router v6** for client-side routing across **8+ views** and a centralised Axios API layer, reducing frontend-backend integration bugs by **~50%** and enabling independent deployment of the React 18 frontend and Python/Flask backend.

Automated Python Docstring Generator | [GitHub](#)

Python, AST, Streamlit, LLM APIs

- Developed an AI-powered tool that auto-generates **structured docstrings** for Python functions and classes, reducing documentation effort by **70%** across 100+ lines of source code in real time.
- Implemented AST-based static code analysis to extract function signatures, arguments, return types, and class metadata; integrated LLM APIs for **Google and NumPy-style** output with rate-limiting.

AI Powered Personal Finance Management System | [GitHub](#)

Python, SQLite

- Developed an **8-module finance application** covering expense tracking, budgeting, reporting, user auth, and data backup managing **1,000+ transaction records**; reduced manual tracking effort by **60%**.
- Designed a **normalised SQLite schema** with automated income/expense reporting and CSV export functionality.

Certifications

- Artificial Intelligence** – Infosys Springboard: AI fundamentals, ML workflows, and LLM application development **2026**
- Cryptography & Cybersecurity Bootcamp** – IIT(ISM) Dhanbad: Security protocols, encryption, and network security
- Hackathon Participation** – HackQuinox, FCRIT, Navi Mumbai: Competitive problem-solving and rapid prototyping under pressure
